Although some patients notice results almost immedi

ately after treatment, improvements typically show in approximately

2 3 weeks. Optimal results are achieved in 3 4 months. O-Shot

treatment results can potentially last up to three years, but many women choose

to have an 18-month follow-up or maintenance treatment.

Many patients experience notic

eable improvements within the first three weeks following treatment, but the ful

l regrowth of tissue is not complete until approximately three months after the

injection. On average, the O-Shot lasts about 12-18 months.
